Welcome to our office!

Congratulations for taking your first step towards wellness and thank you for choosing AC Chiropractic Life Center. We look forward to working with you and your family to maximize your health through the many benefits of chiropractic care.

Our Mission

To establish a place for healing to occur in a natural way by restoring life and health through the adjustment of vertebral subluxations.

Dr. Louis Cavallo and Dr. Jeanette Altieri have been serving the city of Lawrenceville for over 19 years, providing wellness through education and chiropractic adjustments, to both children and adults of all ages. They have dedicated their lives to make sure that all of God's people are able to receive and afford healthcare in order to create a healthier world naturally.

How does Chiropractic improve your health?

Chiropractors identify and correct misalignments of the vertebrae (the small bones that make up the spine) that interfere with the nervous system's communication between your brain and the cells, tissues, and organs of the body.

Correcting these interferences can help prevent or eliminate a variety of health issues.

Chiropractors correct these misalignments by gently adjusting the position of the vertebrae of the spine allowing your body to properly self-regulate, adapt and heal.

Chiropractic provides a natural, cost effective way to improve overall wellness while reducing the need for expensive drugs and surgery.

For your convenience, our office offers flexible scheduling by calling **770-513-8922**.
